Images should be sized at 300PPI, RGB, Jpegs, Profile sRGB or Adobe RGB 1998 embedded.

Allow for 2mm bleed (spill) around all images. (ie 2mm may be lost in the printing process.)

Paper is supplied by manufacturer in Imperial (inch) sizes. For accurate metric sizes, convert inches to cm.

A4, A3, A2 and A1 are supplied on the next larger Imperial sized sheet.

For prints larger than 30" in the smallest dimension, refer to our **Inkjet Price Guide**.

The above prices apply to images supplied ready for printing. For additional services/treatments to files, please refer to our **Additional Services Guide**.

Custom print sizes. If custom print sizes are required the best method is to size your image (image size) to the required size at 300PPI then adjust the canvas (canvas size) to the next larger standard print size listed above. (Some clients fill the spare space with other images e.g. business or promotional cards/images.)

Custom canvas sizes. If custom print sizes are required the best method is to size your image (image size) to the required size at 300PPI. Price is based on next larger canvas size. See "Canvas Only" below for sizing.

¹ **Face Size** is the area on the face of the stretched canvas. It does not include the image which is wrapped around the canvas. Allow an extra 2" image all round for wrapping the canvas to the back of the stretcher frame. E.G. at 20x30" canvas should have an image size of 24x34".

Please note that the top, bottom and side wrap areas may be an extension of the image, a coloured border, other design or plain white. It is up to the artist as to decide what is seen on the edge of the canvas.

Note also, that canvas does stretch when being placed on the stretcher frames so allowance must be made for some spill of the image around the edge of the stretcher.

² **Canvas Only.** No adjustment is made to your image size, add white border, if required, to make your "Face Size" the correct size you require. Charges are based on "Face Size". E.g. face size of 12"x18" should be submitted centred in a 16"x 22" image and will be supplied printed on a 16"x22" piece of canvas.

See www.streetsimaging.com.au/FAQ/canvas for more information.
