

Box Scanning Service

Streets Imaging offers a bulk scanning service for your loose photographs. Please allow a 2 week turn around for this service. Photos must be undamaged, no creasing and no adhesive or attachments.

Small Box (BX1) - \$200

These are available to purchase from the post office. A BX1 will hold up to 300 5x7in prints or up to 600 4x6in prints.

Large Box (BX2) - \$400

These are available to pick up from the lab or purchase from the post office. A BX2 will hold up to 400 A4 or 8x12 in prints, up to 800 5x7in prints or up to 1600 6x4in prints.

Please follow our recommendations to ensure the files arrive to you as expected:

- If you would like the image files to be orientated correctly, please separate your photographs into sizes then piles of portrait and landscape. Be sure that all photos are sitting in the same direction.
- We can create separate folders for images within the box with a minimum of 50 images per folder. These need to be clearly labelled by putting each folder's pile in a clear bag with the name you wish the folder to have written on a piece of paper sitting on top of the first photo. If no folder names are supplied, generic names will be used.
- By default, files will be supplied by email using WeTransfer. If you wish to have them transferred to a device, we can supply USB sticks at an additional charge. Image files will be supplied numbered, and as JPEGs at 300ppi. If you would like to opt for a higher resolution scan of 600ppi please let the staff know prior to scanning.
- There is an additional 10% fee if you wish for your images to be colour corrected. Colour corrections are limited depending on the original image (for more detailed corrections, contact the lab).
- Any professional photographs taken after the 1st of Jan, 1955. You agree that you have the permission of the copyright holder to authorise Streets Imaging to scan the photos.

If you'd like to discuss your scanning needs further or to clarify any of the above information please contact us.
